ABSTRACT

adhesive sheet for a semiconductor connecting An substrate consisting of a laminate having an adhesive layer on substrate, wherein said adhesive layer contains thermoplastic resin (A) and an epoxy resin (B) and said epoxy resin (B) contains at least one epoxy resin (B) selected from (I) dicyclopentadiene skeleton-containing epoxy resins, (II) terpene skeleton-containing epoxy resins, and (III) biphenyl skeleton-containing epoxy resins, as an essential component; an adhesive-backed tape for TAB consisting of a laminate having an adhesive layer and a protective film layer on a flexible organic insulating film. The adhesive sheet for a semiconductor connecting substrate, the adhesive-backed tape for TAB adhesive-backed tape for wire bonding and the connection of the present invention are excellent in adhesive strength, insulatability, dimensional accuracy, etc., and can improve the reliability of a semiconductor integrated circuit connecting substrate and a semiconductor device respectively for high density packaging.
